

**BIODATA AND BIOMETRIC RECAPTURE FOR FEDERAL AND STATE GOVT TREASURY FUNDED
MDAs EMPLOYEES.**

OBJECTIVES OF THE EXERCISE:

1. The main objective of the Data Recapture Exercise is to obtain complete and accurate data of all RSA holders (both active and retired clients in both public and private sectors)
2. To enable PFAs to capture the 10 fingerprints of their RSA holders and their National Identity Number (NIN) to ensure compliance with NIMC
3. It would provide a platform for the collation of relevant information on employees of Federal and State Government Treasury Funded MDAs who transited from the erstwhile Defined Benefit Scheme to the Contributory Pension Scheme. The information would facilitate the expeditious computation of their accrued rights and eliminate the need for yearly enrolment of those due for retirement.
4. It would enable the identification and elimination of multiple registrations from the RSA Registration Database.
5. To ensure that all PFAs implement the minimum standards and requirements set by the Commission for the registration of contributors in the Pension Industry.
